Introduction

MISSION

We are creating a complete and robust ecosystem focused on the world of cryptocurrencies, bringing ease and simplicity to those who do not have experience in the market, developing a range of tools and platforms, and also bringing the most varied services with the sole purpose of contributing with the spread and advancement of cryptocurrencies globally.

GOAL

Our goal is to purpose demand for our cryptoactive, stimulating and invoking the community to use our cryptocurrency, REIBIT, with this process we will add value to our services and products, thus providing value to investors and project holders, who also believe and trust on our team.

CRYPTOCURRENCIES

Cryptocurrencies were developed to be digital assets capable of functioning as a medium of exchange. Capable of providing security based on cryptography, cryptocurrencies have characteristics capable of carrying out financial transactions without the intermediation of a centralized body. are a alternative to the payment model in the current scenario, today they already have more than 9,000 cryptocurrencies on the market, using the most diverse technologies and proposing to solve a multitude of problems.

Cryptocurrencies have no physical representation; that is, they have no ballast. it is generated through a network of several computers, which use their computational power to perform various calculations on authentication algorithms. Each cryptocurrency unit is validated by a chain of encrypted blocks, the blockchain, which is a technology capable of generating transaction reliability.

Once a cryptocurrency is mined and available, fractions of them are given to the owners of the machines that collaborated with the calculations.

Today, many products and services can be paid for with cryptocurrencies, through specific applications that perform financial operations.

BLOCKCHAIN

Blockchain technology can be understood in many ways. We can say that it is a new distributed log database system, maintained and managed in a shared and decentralized way (through a peer-to-peer network, better known as P2P), in which all participants are responsible for storing and maintaining the database of all information. The technology was built with the main architectural features in mind, such as: operations security, storage/computing decentralization, data integrity, and transaction immutability.

Freely translated, the blockchain is a digital logbook, in which data is stored in a decentralized manner by each of the agents of the transaction in question. Protected by encryption mechanisms, the information placed in the system is, in theory, inviolable and fraud-proof. independents that are part of the network, making it difficult for hackers to act

REIBIT CRYPTOCURRENCY

Using all the advantages presented so far, thinking of the various advantages over the creation and use of a cryptocurrency and also the blockchain, the REIBIT team decided to add a cryptocurrency to our services and products.

With its blockchain capable of bringing a multitude of benefits to our project.

The first one is because it is a payment and receipt currency that will be linked on all our platforms.

Secondly, everyone who owns our RIT cryptocurrency is in some way investing in the project and funding the development of a variety of REIBIT services and products.

A transparent project, which will feature a robust roadmap, a skilled team, and innovative services, is capable of giving a boost to any visionary investor. Our currency will be hybrid, that is, we will work with two consensus methods network POW (Proof of Work) and POS (Proof of Stake), and our investors have already started to make a real profit from the moment they acquire our currency and use any of the methods mentioned above.

Technical details

SPECIFICATIONS REIBIT

The REIBIT cryptocurrency (rit) will have a well-organized division and concise that may be completely understood in the side frame.

REIBIT CRYPTOCURRENCY

About the division

15%
PRÉ-MINE
3.150.000 rits

85%
POW e POS
17.850.000 rits

100%
21.000.000 rits

DIVISION

The 15% Pre-Mine will be used for the total development and maintenance of platforms and services, and will have the following division, seen in the graph below:

AIRDROPS/REWARDS

DEVELOPMENT

SALES

DEVELOPERS

TECHNOLOGY USED

Name: REIBIT

Symbol: RIT

Algorithm: Quark

Block type: PoS/PoW/MN

Reward (PoW): 5 RIT'S

Reward (PoS): 2,5 RIT'S

Reward Superblock: 3%

Reward Masternode: 72%

Collateral Masternode: 20000 RIT'S

Masternode Confirmations: 21 blocos

Masternode Maturity: 20

BlockTime: 3 minutes

Reset Dificuldade: 3 minutes

Transaction Confirmations: 5 blocos

Platforms

REIDOBITCOIN CHANNEL

The REIDOBITCOIN channel was designed in 2018, to bring the world of cryptocurrencies to people who do not know about the subject, showing how to take the first steps in this market. bringing what's best in the crypto atmosphere.

TOKENBIT

A platform that will make it possible to create smart contracts quickly and easily, with simple mouse clicks, a person with little computer knowledge will be able to create their token on the network of ETHEREUM (erc20), later on, other blockchains will be included allowing the creation of tokens in other networks, among them it is possible to mention: EOS, CARDANO, NEO.

ENSINOBIT

A platform dedicated to the study and preparation of beginners in the cryptocurrency market.

At ENSINOBIT all users will find a range of well-structured tools, and trained professionals willing to assist in the development of the cryptocurrency market.

REIBIT EXCHANGE

Working together with TOKENBIT, our REIBITEXCHANGE platform, a free trade exchange for cryptocurrencies, will feature several tools as well as resources for its users to carry out their purchases and sales, bringing a unique experience to its users.

HOW OUR HISTORY HAS BEEN BUILT

ROADMAP

Since 2018 the Reibit project follows determined to innovate and evolve in the world of cryptocurrencies

2018

Q2

Creation of the YouTube channel REIDOBITCOIN
Search for partnerships with other channels
Creation of the channel's social networks
SEO of the YouTube channel

2019

Q1

Publication of videos on the channel
Partnership with cryptocurrency channels
Updating social networks

2020

Q1

Publication of videos on REIDOBITCOIN channel
Partnership with cryptocurrency channels
Social networks update

2021

Q2

Partnership with "Fanaticos Criptos"
Branding of REIBIT
Creation of support materials for dissemination
REIBIT development
Creation of REIBIT's institutional website REIBIT.IO V1.0
Whitepaper10
Roadmap 1.0
Launch of the REIBIT cryptocurrency
Explorer 1.0
Partner with projects

Q3

- Listing on FCBETTING
- Listing on SeedList
- Community membership increase
- Partnership with projects
- REIBIT.IO website update 2.0
- Masternode in the REIBIT wallet
- Stake in the REIBIT wallet
- Whitepaper 2.0
- Roadmap 2.0
- Explorer 2.0
- Wewallet REIBIT 1.0
- Creation of TOKENBIT 1.0
- Listing on MASTER STAKING MOBILE
- Partner with projects

2022**Q1**

- Listing on coingecko
- Listing on CoinMarketcap
- Listing on EXCHANGE
- Listing on MASTERNODE.BIZ
- Marketing and advertising push
- Creation of the REIBIT application
- Partner with projects

Q2

- Channel update
- 20,000 subscribers on REIDOBITCOIN channel
- Presentation website for the channel
- Partner with projects
- TOKENBIT platform update
- Integration with other blockchains 2.0

Q3

- REIBIT.IO website update 3.0
- EXCHANGE listing
- RIT community growth
- Project partner channels
- Update APPLICATION 2.0
- Creation of the MASTERBIT platform

2023

Q3

- Channel update
- Search for large companies as partners
- Site update
- Roadmap update
- Creation of the REIBIT decentralized exchange
- 30,000 subscribers to the REIDOBITCOIN channel

2024

A lot of updates are to come, believe in our determination and commitment.
